

ERIC GICHOHI

Nairobi, Kenya po box 1000 | (254)745834227 | mejjaeric6@gmail.com |

Dynamic and versatile professional with expertise in software development, ethical hacking, and cybersecurity. Passionate about artificial intelligence and its applications, I also bring creative storytelling skills as a film producer, blending technical proficiency with innovative thinking to drive impactful solutions.

EXPERIENCE

Cybersecurity enthusiast

With extensive research experience in cybersecurity, I have deepened my understanding of various security protocols, threat detection, and mitigation strategies. My commitment to staying updated on emerging threats and trends forms the foundation of my knowledge, allowing me to contribute effectively to securing digital environments.

Software Developer

As a software developer, I have successfully completed numerous projects encompassing web and mobile applications. My experience spans various programming languages and frameworks, enabling me to create innovative solutions tailored to user needs. I take pride in my ability to deliver high-quality, efficient code

Artificial Intelligence

Recently certified in artificial intelligence, I possess a strong skill set in machine learning and data analysis. My passion for AI drives me to explore its practical applications across industries. I am eager to leverage my knowledge to develop intelligent solutions that enhance decision-making processes.

EDUCATION

Dec 2024

Certificate in software development from cisco

April 2025

Certificate in fundamentals of AI and Generative AI from skill build

July 2025

Certificate in ethical hacking from cisco

SKILLS

- Machine Learning Algorithms
- UI/UX Design
- Natural Language Processing (NLP)
- Testing and Debugging
- Social Engineering
- Penetration Testing
